SUMMARY

- 2+ years of extensive experience in developing features in a Product Development Team for a leading software company
- Continuously proven to be a fast learner, independent and critical-thinker
- Strong background in Core Java and understanding of Object-Oriented concept. Skilled in the design of requirements and problem-solving. Experienced in using Groovy, JavaScript and jQuery

EDUCATION

- **University of Santo Tomas** Manila, Philippines
Bachelor of Science in Computer Science *Jul. 2014 – Jun. 2018*

PROFESSIONAL EXPERIENCE

- **Oracle** Taguig, Philippines
Associate Applications Engineer *Jul 2018 - Present*
 - As part of Oracle Utilities Product Development Enterprise Team, I mainly developed enhancements for Oracle products such as Customer Care and Billing and Customer To Meter and Operational Device Management which gained new customers, upgrades and re-licensed of the product. Accessed by thousands of utility customers and saved energies up to billion kilowatts in the United States.
 - Experienced on working in an Agile Scrum Software Development from requirements definition up to deployment
 - Created detailed designs out of functional designs and with minimal review points
 - Developed algorithms that handles the integration of data between Oracle Utility products
 - Developed batches that extracts a very high volume of data into a flat file
 - Developed APIs using Java and Groovy for utility customers
 - Developed algorithms that handles the integration of data between Oracle Utility products
 - Developed responsive and accessible user interfaces for the products
 - Handled complex bugs in automatic payments, integration, billings and financials and fixed it that made the customers met their go live and milestone
 - I'm also involved in the mentoring of new hires in the development process of the application

STUDENT WORK EXPERIENCE

- **Accenture** Mandaluyong, Philippines
Intern *Jul 2017 - Sept 2017*
 - As part of Accenture CIO, I've worked on the automation testing of the internal application
 - Developed a script that automates the whole application using a Selenium based framework in a very limited time
 - Recognized as one of the best interns

PROJECTS

- **Oracle Patch Portal:** Developed a spring boot application that automates the process of bug patch approvals from development build manager to QA build manager

CERTIFICATION

- **Oracle Certified Associate:** Oracle Java SE 8 Programmer
- **Oracle Certified Associate:** Oracle Cloud Infrastructure Foundations

PROGRAMMING SKILLS

- **Languages:** Java, Groovy, JavaScript, jQuery, Oracle SQL, CSS, HTML
- **Technologies:** Hibernate, JUnit, SOAP, REST, XML, JSON, SpringBoot
- **Tools:** Eclipse, IntelliJ, Maven, Hudson/Jenkins, Tortoise/Git, SOAP UI, Postman
