SUMMARY

- 2+ years of extensive experience in developing features in a Product Development Team for a leading software company
- Continuously proven to be a fast learner, independent and critical-thinker
- Strong background in Core Java and understanding of Object-Oriented concept. Skilled in the design of requirements and problem-solving. Experienced in using Groovy, JavaScript and jQuery

EDUCATION

- **University of Santo Tomas** — Manila, Philippines
  Bachelor of Science in Computer Science — *Jul. 2014 – Jun. 2018*

PROFESSIONAL EXPERIENCE

- **Oracle** — Taguig, Philippines
  Associate Applications Engineer — *Jul 2018 - Present*
  - As part of Oracle Utilities Product Development Enterprise Team, I mainly developed enhancements for Oracle Customer Care and Billing and Oracle Customer To Meter and Operational Device Management products which gained new customers, upgrades and re-licensed of the product. Accessed by thousands of utility customers and saved energies up to billion kilowatts in the United States.
    - Experienced on working in an Agile Software Development from requirements definition up to deployment
    - Created detailed designs out of functional designs and with minimal review points
    - Developed batches that extracts a very high volume of data into a flat file
    - Developed algorithms that handles the integration of data from one application to another such as Opower, Oracle Meter Data Management and Oracle Field Service Cloud
    - Developed responsive and accessible user interfaces using the data in the integration environments
    - Handled complex bugs in automatic payments, integration, billings and financials and fixed it that made the customers met their go live and milestone
  - I've also worked on using Oracle Utilities Testing Accelerator, a utility product that automates web service testing
    - Designed and delivered a component for the newly created financial REST service on time
  - I'm also involved in the mentoring of new hires in the development process of the application

STUDENT WORK EXPERIENCE

- **Accenture** — Mandaluyong, Philippines
  Intern — *Jul 2017 - Sept 2017*
  - As part of Accenture CIO, I've worked on the automation testing of the internal application
    - Developed a script that automates the whole application using a Selenium based framework in a very limited time
    - Recognized as one of the best interns

PROJECTS

- **Oracle Patch Portal**: Developed a spring boot application that automates the process of bug patch approvals from development build manager to QA build manager

CERTIFICATION

- **Oracle Certified Associate**: Certified Oracle Java SE 8 Programmer

PROGRAMMING SKILLS

- **Languages**: Java, Groovy, JavaScript, jQuery, Oracle SQL, CSS, HTML
- **Technologies**: Hibernate, JUnit, SOAP, REST, XML, JSON, SpringBoot
- **Tools**: Eclipse, IntelliJ, Maven, Hudson/Jenkins, Tortoise/Git, SOAP UI, Postman
