SUMMARY

- 2+ years of extensive experience in developing features in a product development team for a leading software company
- Continuously proven to be a fast learner, independent and critical-thinker
- Strong background in Java and understanding of Object-Oriented concept. Skilled in the design of requirements and problem-solving. Experienced in using Groovy, JavaScript and jQuery

EDUCATION

- **University of Santo Tomas**   Manila, Philippines
  Bachelor of Science in Computer Science   *Jul. 2014 – Jun. 2018*

EXPERIENCE

- **Oracle**   Taguig, Philippines
  Application Developer   *Jul 2018 - Present*
  - As part of Oracle Utilities Product Development Enterprise Team, I mainly developed enhancements for Oracle products such as Customer Care and Billing and Customer To Meter and Operational Device Management which gained new customers, upgrades and re-licensed of the product. Accessed by thousands of utility customers and saved energies up to billion kilowatts in the United States.
    - Created detailed designs out of functional designs and with minimal review points
    - Developed batches that extracts a very high volume of data into a flat file
    - Developed APIs using Java and Groovy for the utility products
    - Created algorithms that handles the integration of data between Oracle's utility products using Core Java and Groovy
    - Developed responsive and accessible user interfaces using JavaScript, HTML, CSS and jQuery library for the products
    - Handled complex bugs in automatic payments, integration, billings and financials and fixed it that made both the on-premise and cloud customers met their go live and milestone
    - Created an application to simplify patching process using Spring Boot, Thymeleaf and Bootstrap
  - I'm also involved in the mentoring of new hires in the development process of the applications

- **Accenture**   Mandaluyong, Philippines
  Intern   *Jul 2017 - Sept 2017*
  - Worked under Accenture CIO - Quality, contributed to Agile Development process and demonstrated skill in Java for automation

PROJECTS

- **Oracle Patch Portal**: Developed a spring boot application that automates the process of bug patch approvals from development build manager to QA build manager.
- **OBytes Vessel Reporting and Tracking System**: Developed during the 1st Karagathon in the Philippines. A cloud based spring boot application that manages the reports for illegal fishing and maritime violations. The reports include an image/video using an Android mobile application connected to the application.

RECOGNITIONS

- **Shortlisted Team/Semi-finalist**
  - One of the Top 15 out of 23 teams in the 1st Karagatan Hackathon in the Philippines

CERTIFICATIONS

- **Oracle Certified Associate Java SE 8 Programmer**
- **Oracle Cloud Infrastructure Foundations 2020 Certified Associate**

PROGRAMMING SKILLS

- **Languages**: Java, Groovy, JavaScript, jQuery, Oracle SQL, CSS, HTML
- **Technologies**: Hibernate, JUnit, SOAP, REST, XML, JSON, Spring Boot, AWS
- **Tools**: Eclipse, IntelliJ, Maven, Jenkins, Git, SVN
